

Alaska's Grade Level Expectations GLEs

The GLEs list the specific knowledge and skills Alaskan students need to master in grades K - 10. The GLEs address two main goals:

1. The GLEs identify learning goals for all Alaskan students.
2. Alaska's state tests, which measure student learning, are closely matched to the GLEs. These tests also measure how successfully schools are teaching all students.

You can help your child in important ways.

1. Ask the teacher if your child has difficulty in completing grade level work in reading, writing, or math (pre-algebra, algebra, or geometry for older students).
2. Find out what you can do at home to support his learning in any of these areas. This may include reviewing homework, reading with your child, or creating learning goals and expectations with your child.
